I am looking for a owners guide in PDF format for the 2008 zodiac Yachtline 420 Deluxe. Any help would be appreciated. Thank you! Bill - Having and has been around more mid-to-large central console-type inflators I'd say it depends. In the group we boat with there were 10.5 AB's, 11'/12.5/14' zodiacs, Noveranias, Avons, Nauticas, and a few others. 10.5 AB has 30 hp 4 stroke Nissan and 11' zodiac has 25 HP 4 stroke Yamaha, which perform relatively well in reasonable seas with a pair of up to 3 on board. They need to be propped up correctly and the height of the engines should be properly adjusted for this to happen - in some cases smart tabs or the like are a huge advantage. I also know that our 98' zodiac YL-380 is very different from the new 2004 zodiac YL-380, and they have the same name and badges. The new zodiacs are more plush and have internal amenities, but they are generally heavier, heavier on the stern, don't have built-in old-style stern tabs, and generally mount the engines below. All this often leads to the comparison of apples with oranges. For OP - please show the current speed of the support, and then look at the height of the support and the condition of the engine in this order. Usually once you get above 15' or so the solution and speed is much easier to achieve. Hope this helpsPage 2Engines, Electric, Plumbing, etc. all mechanical and ElectricalPage 3 New messages from the last logo. Old messages. Closed theme. Take a deep breath... share unforgettable moments with friends and family.
